

Climate

LEADERSHIP SUMMIT

*FRIDAY APRIL 10, 2020, 9AM-1:30PM
CSU LORY STUDENT CENTER*

Organized by high school students, for high school students.

The Climate Leadership Summit is a solution focused event designed by high school students to provide and inspire other students who are interested in STEM, entrepreneurship, leadership, climate change, and environmental sustainability. It brings students together with people, ideas and information that point to making a healthy, and more inspiring future. Our aim is to translate environmental knowledge and concern action that supports a new economy through all of our careers and activities in the future. The potential high school students hold for making changes in their own communities and the world is incredible. Our goal is to deliver a message of inspiration and hope. For 2020, it's hosted at Colorado State University in partnership with the School of Global Environmental Sustainability & Poudre School District's Futures Lab, and open to all high school students.
